CONTENTS

CORE STOCK PROGRAM

Garments displaying this icon are part of our new stock guarantee program. Available when you need it 24/7. Guaranteed!

3M

Our workwear uses only genuine 3M brand reflective tape on all our taped garments, in accordance with AS/NZS 1906.4. Consistent quality control inspections ensure delivery of the genuine article.

UPF 50+

Garments displaying this feature have the highest level of UV protection: Excellent category rating for Ultra Violet Protection (UPF), the ultimate sun safety.

BREATHABLE

Garments that display this feature are breathable.

QUICK DRY

Garments displaying this feature will dry quickly after washing or heavy perspiration.

VENTING SYSTEM

Garments have a purpose built venting system to keep you cool, including our "Comfort Crotch®" (Patent Pending).

WATERPROOF

Garments that display this feature are waterproof.

ZIP IN SLEEVES

Garments displaying this feature are part of a series of component garments that can be zipped into and out of each other.

DAY

Garments displaying this feature provide the wearer with high visibility for use in daylight conditions only and comply with relevant AUS/NZ standards.

NIGHT

Garments displaying this feature provide the wearer with high visibility for use in low light and night conditions. This is achieved through the use of 3M reflective tape and complies with relevant AUS/NZ standards.

DAY/NIGHT

Garments displaying this feature provide the wearer with high visibility for use in all light conditions including day and night use, complying with relevant AUS/NZ standards.

FLUORO

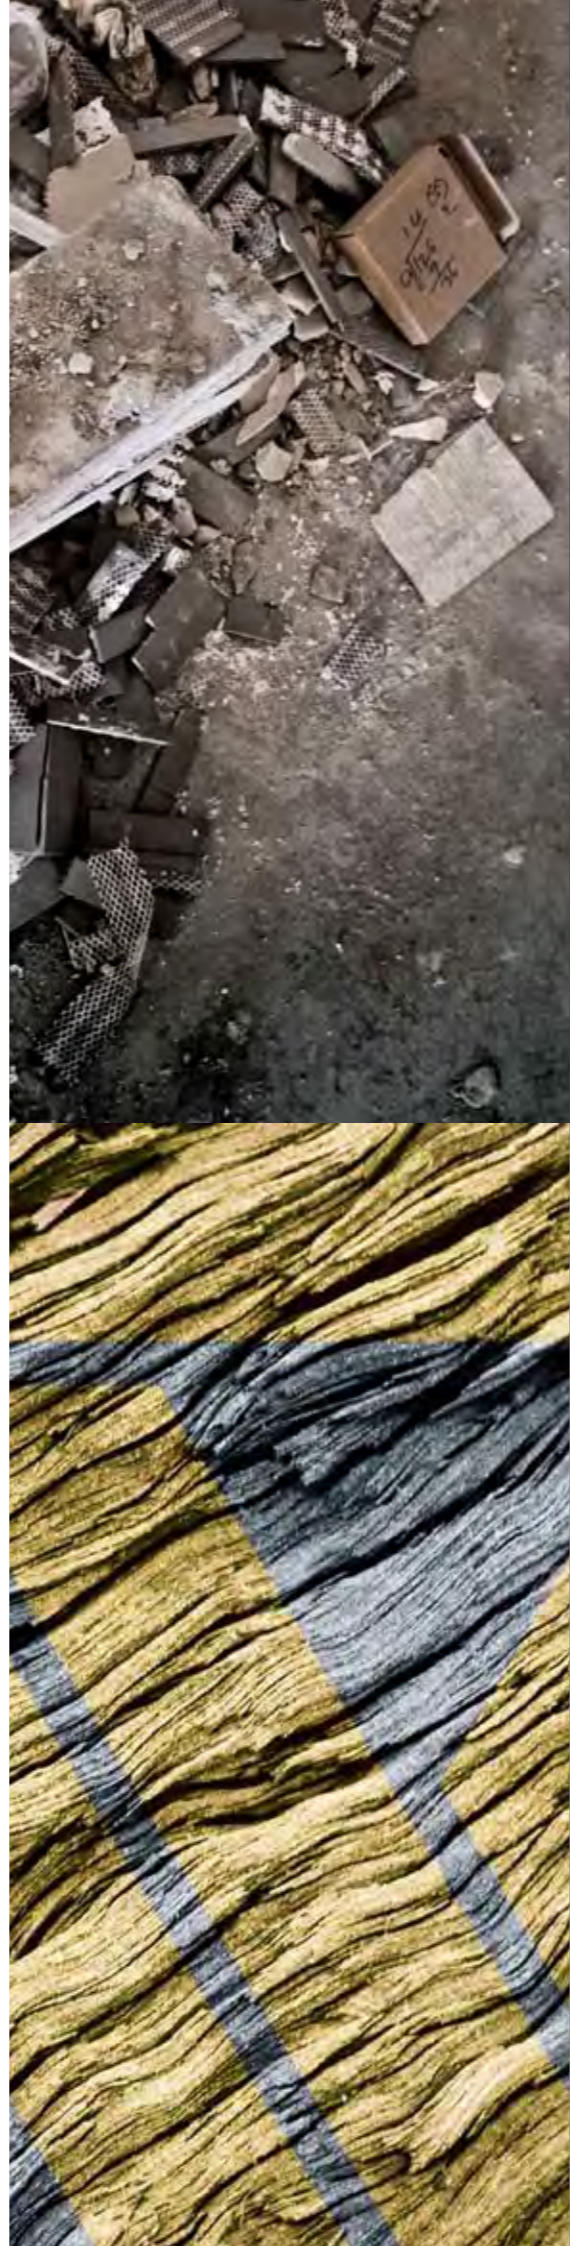

Garments displaying this feature are manufactured from specially developed fluorescent materials and comply with relevant AUS/NZ standards for chromaticity.

REFLECTIVE

Garments displaying this feature are manufactured to include 3M reflective tape and comply with relevant AUS/NZ standards for reflectivity.

REFLECTIVE/FLUORO

Garments displaying this feature are manufactured from specially developed fluorescent materials plus 3M reflective tape, complying with relevant AUS/NZ standards for both class R and F.

THE STANDARDS HAVE CHANGED AND SO HAVE WE...

DO YOU WEAR HIGH VIS POLO SHIRTS OR FLUORO WORK GEAR?

Then this new high visibility standard **4602.1** affects you.

MANY HIGH VISIBILITY SHIRTS WILL NO LONGER BE COMPLIANT AS OF 31/08/2012, SO HOW CAN YOU BE SURE THAT YOUR WORK GEAR IS STILL SAFE?

Check to see it has the VISITEC 4602.1 compliancy label on it. You can be sure that any garment carrying the **VISITEC 4602.1** label is 100% compliant to the new Australian standard AS/NZS 4602.1:2011 for high visibility safety garments.

SOUNDS COMPLICATED?

No, it's pretty easy really ... here's what you need to know:

The principal change from the old version of this standard is the more rigorous specification in the amount of high visibility material required on a garment for daytime visibility.

Plain English: More fluoro colour equals more safety at work.

ARE YOU PROTECTED?

With VISITEC you are. Stay safe in **VISITEC 4602.1**, as tested by accredited Australian compliancy testing authorities.

3 THINGS YOU NEED TO KNOW TO KEEP YOU SAFE...

1 IS YOUR WORKWEAR COMPLIANT TO AS/NZS 4602.1?

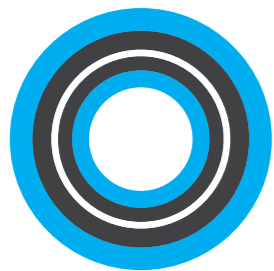

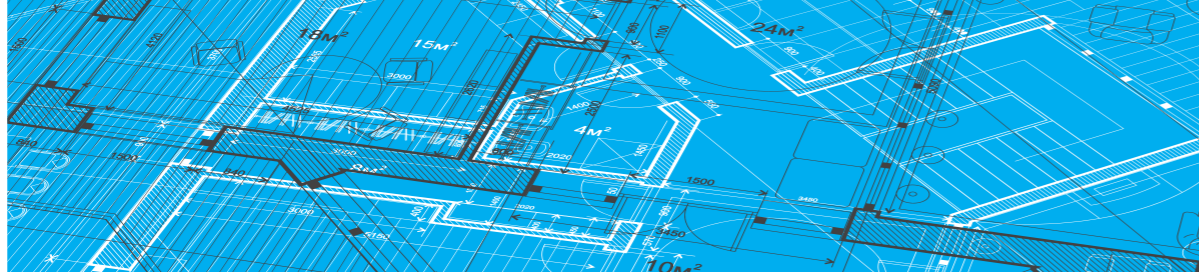

This standard relates to the design of the garment and specifically the amount of high visibility material on the front and back of your gear. Check the garment label; all VISITEC High Visibility workwear is 100% compliant to the new Australian standard AS/NZS 4602.1:2011 for high visibility safety garments.

2 IS THE FLUORO COLOUR COMPLIANT TO AS/NZS 1906.4?

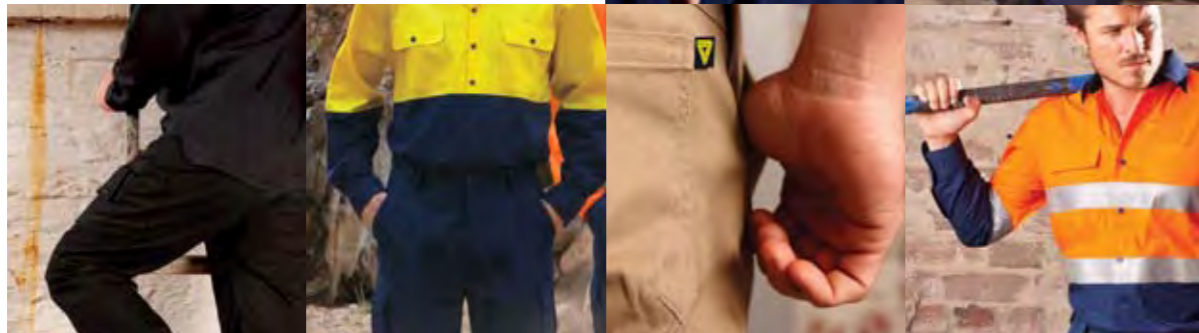

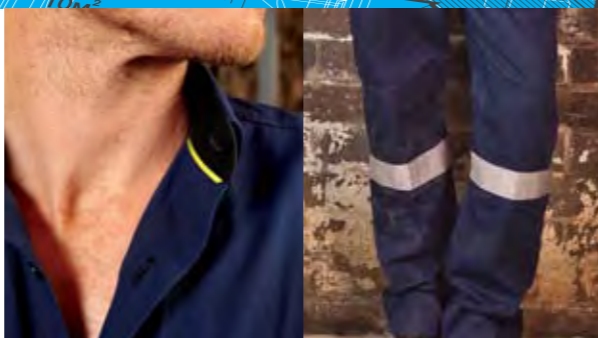

This standard relates to the specific colour and material of your work gear. Check the garment label; all VISITEC High Visibility workwear carries the 1906.4 compliancy info.

3 ARE YOU SUN SAFE? DOES YOUR WORKWEAR COMPLY WITH AS/NZS 4399 STANDARD FOR SUN PROTECTIVE CLOTHING?

Check the garment label; All VISITEC High Visibility polo's carry the 4399 compliancy info with a rating of Excellent 40-50+.

CORE STOCK PROGRAM

READY WHENEVER YOU NEED IT...

VISITEC understands that delivery-in-full is most important, that's why we developed **The Core Stock Program**. This is a collection of essential VISITEC gear that we guarantee will be in stock whenever you want it, 24/7.

When you see The Core Stock Program icon  in the catalogue, we guarantee these garments will be available for immediate delivery. Check that the specific colour you need is included in The Core Stock Program offer, because not all colours are included.

This is the way we do business and we guarantee it or you get \$100 credit off your next order.* Put us to the test on **The Core Stock Program**, we won't let you down.

You can find the following garments included in **The Core Stock Program**:

FUSION

THE FUSION RANGE

A COMBINATION OF ELEMENTS...

The VISITEC Fusion range of cotton workwear combines a durable design with breathable comfort.

Cotton fabric is naturally absorbent, durable, breathable and biodegradable. Square weave fabric is strong, hard wearing, and most importantly, increases airflow.

VISITEC square weave cotton shirts have been tested by the CSIRO, and are 2 times more breathable than comparable light weight drill shirts.

WHAT DOES THAT MEAN FOR YOU?

These Fusion shirts will keep you cooler and more comfortable than the basic drill shirt you are wearing now.

Comfort Plus areas have been specially developed, providing absorbency to reduce chaffing at the neck and around the waist, ensuring optimum comfort and wearability.

Air vents are a standard, key feature in all Fusion garments. The **VISITEC Comfort Crotch®** (patent pending) provides an airflow to keep you cool, especially in the hot summer months, and stretch for added movement where you need it most.

◀ **FUSION LIGHTWEIGHT UTILITY PANT V8002**

WORKWEAR

THE WORKWEAR RANGE

VISITEC industrial strength workwear is specifically designed for your working environment by bringing together function and technology in each design.

Our durable workwear is manufactured to the highest quality and safety standards, featuring modern design and superior comfort.

Workwear made from cotton drill and cotton square weave fabric are preshrunk to minimise shrinkage during laundering. A rigorous testing process has ensured each garment meets the highest standard of quality, and boasts stability, UV protection, abrasion resistance, colour fastness and durability.

Cotton is a naturally comfortable and hard wearing fabric, making it the perfect choice for workwear that has to withstand the elements in a tough environment.

Standard features of VISITEC workwear include:

- Twin or triple stitched seams
- Bar-tacked stress points for added strength
- Mesh venting for breathability
- High quality studs, buttons and zips for lasting function and durability
- Superior materials including 3M reflective tape and fabric from specialised mills

AIRWEAR

THE AIRWEAR RANGE

**6 X MORE BREATHABLE THAN
LIGHTWEIGHT COTTON.**

WORK HARDER, BREATHE EASIER...

VISITEC AIRWEAR® is a patented breakthrough in breathable fabric technology, which increases airflow around your body, creating it's own venting system.

VISITEC AIRWEAR® has been independently tested by the CSIRO, which has confirmed that this unique fabric is superior in air permeability and in transporting moisture away from the body in comparison to other regular workwear fabrics, including 100% cotton and regular polyester.

VISITEC AIRWEAR® reduces heat by allowing body sweat to be transported through the unique fabric structure, resulting in quicker evaporation. The fabric's lightweight structure and grid system also allows for maximum airflow between the body and garment, ensuring you'll stay cool.

SUBLIMATION PRINTING

Garments carrying the sublimation warning have been created using a printing process called sublimation printing. This process provides sharp and bright fluoro colours with a great soft hand feel. Special care needs to be taken when decorating these polos: Sublimated garments are heat sensitive and colour migration will occur if you do not follow the care instructions. If you are screen printing you **MUST** lay them flat at all times and do not fold any parts during heating or drying processes. Polo's must remain flat and separated while they cool down completely after printing or colour migration may occur. For more information please contact customer service.

SUBLIMATION PRINTING

Garments carrying the sublimation warning have been created using a printing process called sublimation printing. This process provides sharp and bright fluoro colours with a great soft hand feel. Special care needs to be taken when decorating these polos: Sublimated garments are heat sensitive and colour migration will occur if you do not follow the care instructions. If you are screen printing you MUST lay them flat at all times and do not fold any parts during heating or drying processes. Polo's must remain flat and separated while they cool down completely after printing or colour migration may occur. For more information please contact customer service.

MICROFIBRE

THE MICROFIBRE RANGE

MICROFIBRE VS. MICROMESH... WHAT'S THE DIFFERENCE?

Micromesh describes the structure of the fabric. Microfibre describes the yarn the fabric is woven from.

Most high visibility polo shirts in the Australasian market are made from standard polyester micromesh, resulting in a lesser quality garment. VISITEC only uses high quality microfibre, ensuring durable, micro mesh polo shirts that offer superior performance and feel.

MICROFIBRE...THE FACTS!

Microfibres are densely packed filaments, contained within a hollow fibre. The fibres result in a soft, breathable fabric, ensuring maximum comfort. The fabric is quick drying and boasts excellent wash and wear properties.

WET WEATHER

THE WET WEATHER RANGE

*KEEPING YOU DRY IS ONLY HALF THE JOB
OF A QUALITY RAIN JACKET.*

The VISITEC Elements range is breathable and waterproof. The fabric has been tested and developed to provide excellence in 2 specific areas:

1. Hydrostatic pressure testing. This test measures water resistance to ensure the jacket is waterproof from external elements.
2. Moisture vapour permeability (MVP). This tests the release of excess moisture and heat from within the jacket fabric.

VISITEC garments include waterproof zippers, ID pockets, hand warmer pockets, "pit zips" to enhance underarm airflow, dedicated MP3 or phone pockets, and various concealed vents which prevent water entry while still allowing airflow.

The VISITEC wet weather jacket provides protection with the added comfort of breathability.

1. INNER VEST

2. INNER VEST JACKET WITH SLEEVES

3. OUTER JACKET / 4. OUTER JACKET + INNER VEST / 5. OUTER JACKET + INNER VEST JACKET WITH SLEEVES

ELEMENTS "5-IN-1" JACKET V7000

- Day/Night Outer shell jacket
- Day/Night Inner Jacket with zip off quilted sleeves
- Day/Night Inner jacket converts to Day/Night vest by zipping off sleeves
- All items 100% waterproof and seam sealed
- Dual entry MP3/ Phone pocket
- Waterproof zipper pockets
- Hand warmer pockets
- Silicone ID pocket and cuff adjusters
- Genuine 50mm, 3M reflective tape
- Vest also zips into V7001 Breathable Racing jacket
- Complies with AS/NZS4399
- Complies with AS/NZS4602.1 - Class D/N
- Complies with AS/NZS1906.4 - Class R/F

FABRIC 300 Denier Oxford Polyester

SIZES S-6XL

CODES YELLOW/NAVY **V7000-YN**

ORANGE/NAVY **V7000-ON**

FEATURES UPF 50+ / Breathable / Waterproof / Zip In Sleeves / Day & Night / Reflective & Fluoro / 3M Tape

1. INNER VEST

Wear the day / night vest without the zip off sleeves when you need the lightest, HiVis protection.

2. INNER VEST JACKET WITH SLEEVES

Zip the sleeves onto the vest when the temperature drops for a lightweight alternative to the full jacket.

3. OUTER JACKET

Wear the Elements jacket on its own and use all the benefits of the innovative design and features.

4. OUTER JACKET + INNER VEST

For medium weight protection against the elements, zip the vest into the jacket and cut out the cold.

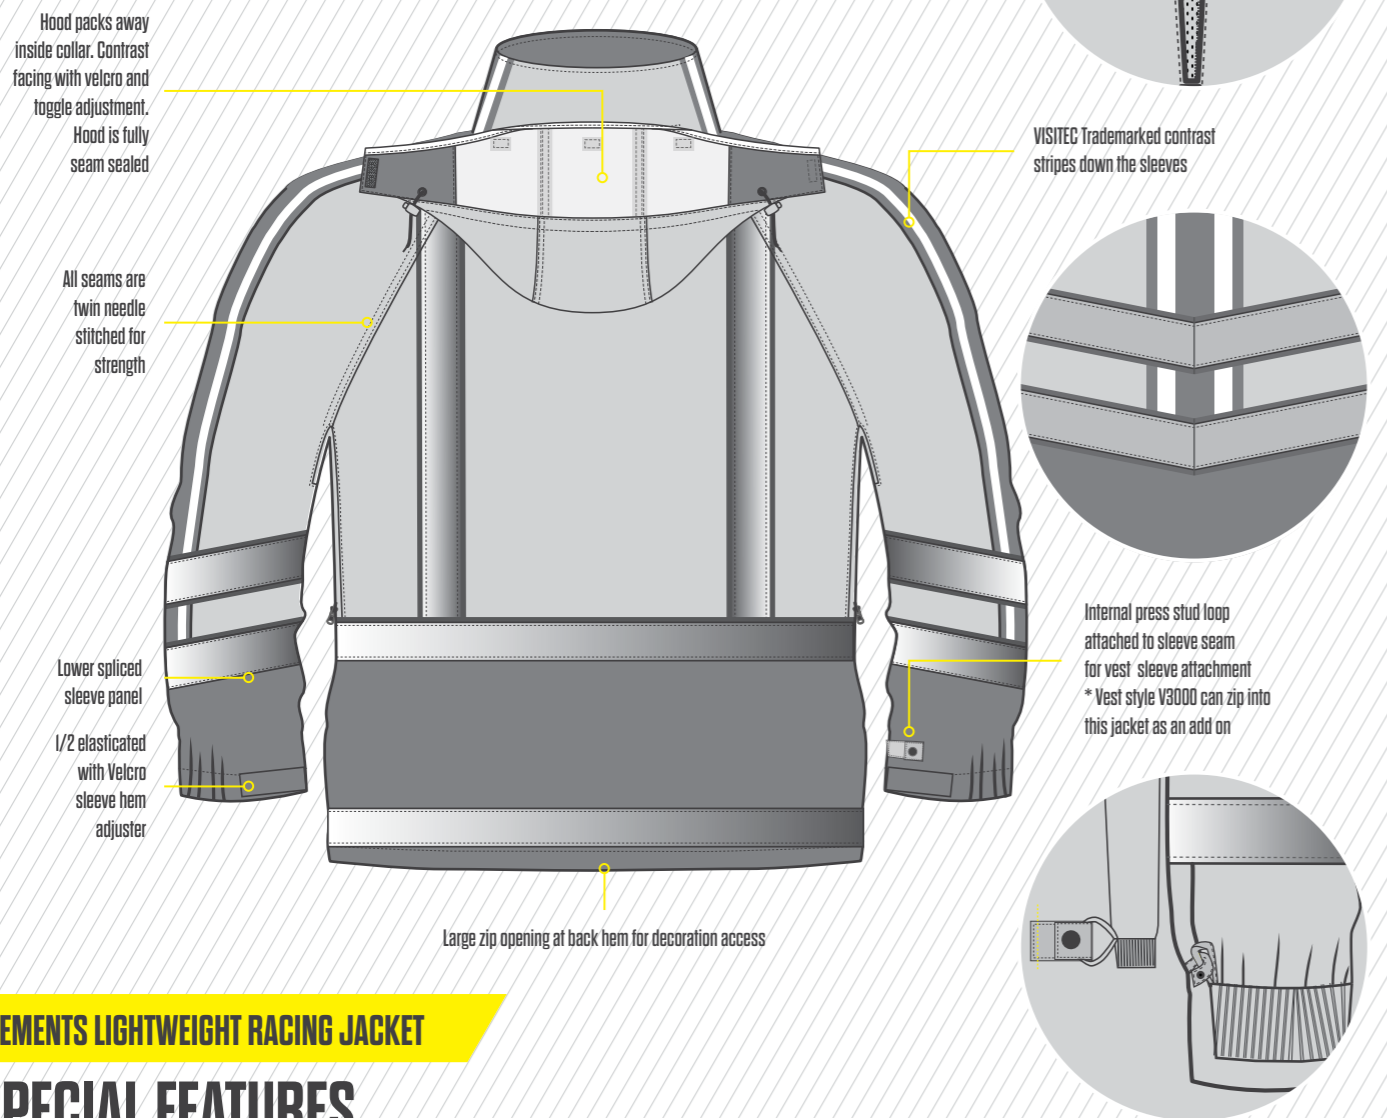

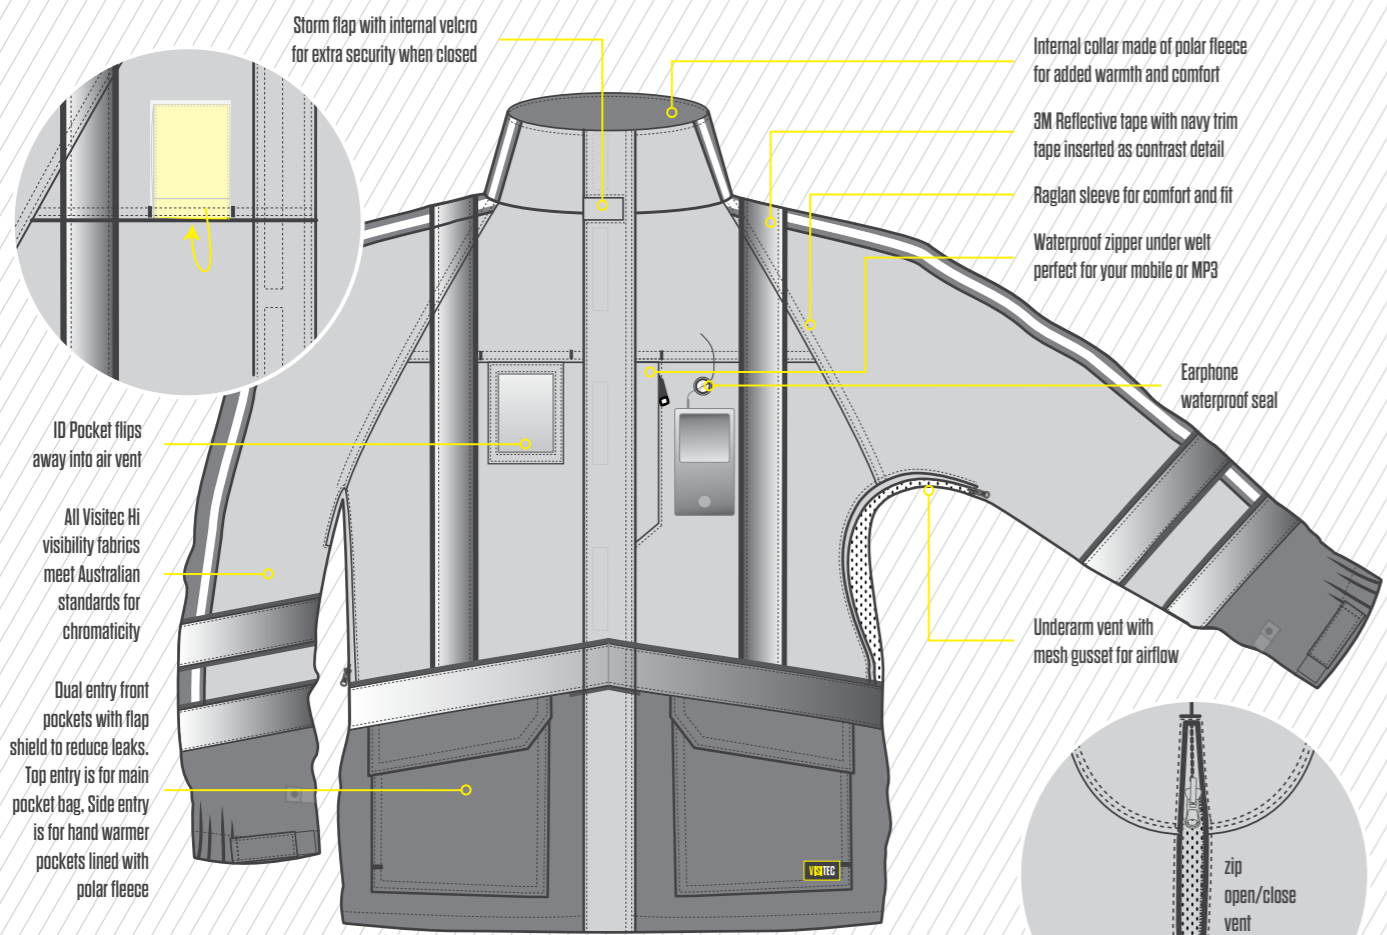

5. OUTER JACKET + INNER VEST JACKET WITH SLEEVES

For the ultimate in protection and warmth, zip the vest and sleeves into the 5 in 1 jacket and get to work in comfort.

HOW TO MEASURE YOURSELF (MALE)

NECK: Measure around your neck where the collar sits, allowing two fingers behind the tape measure for comfort.

CHEST: Measure around the fullest part of your chest at the under arm point, ensuring tape measure is level across the back.

WAIST: Measure with a tape measure around your natural waist line, this is where your pants sit. Do not measure over the waistband of the pants you are wearing! You should measure for a firm yet comfortable fit against the skin.

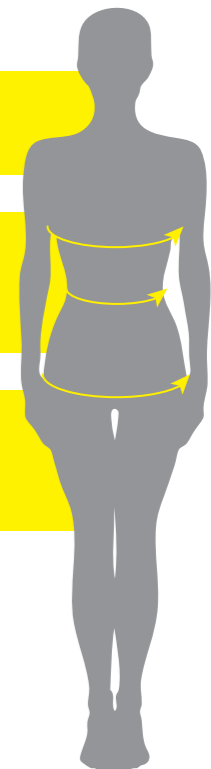

INSIDE LEG: Measure from the fork of the seams under your crotch down to the top of the heel of your shoe, this should be about 1cm from the floor.

HOW TO MEASURE YOURSELF (FEMALE)

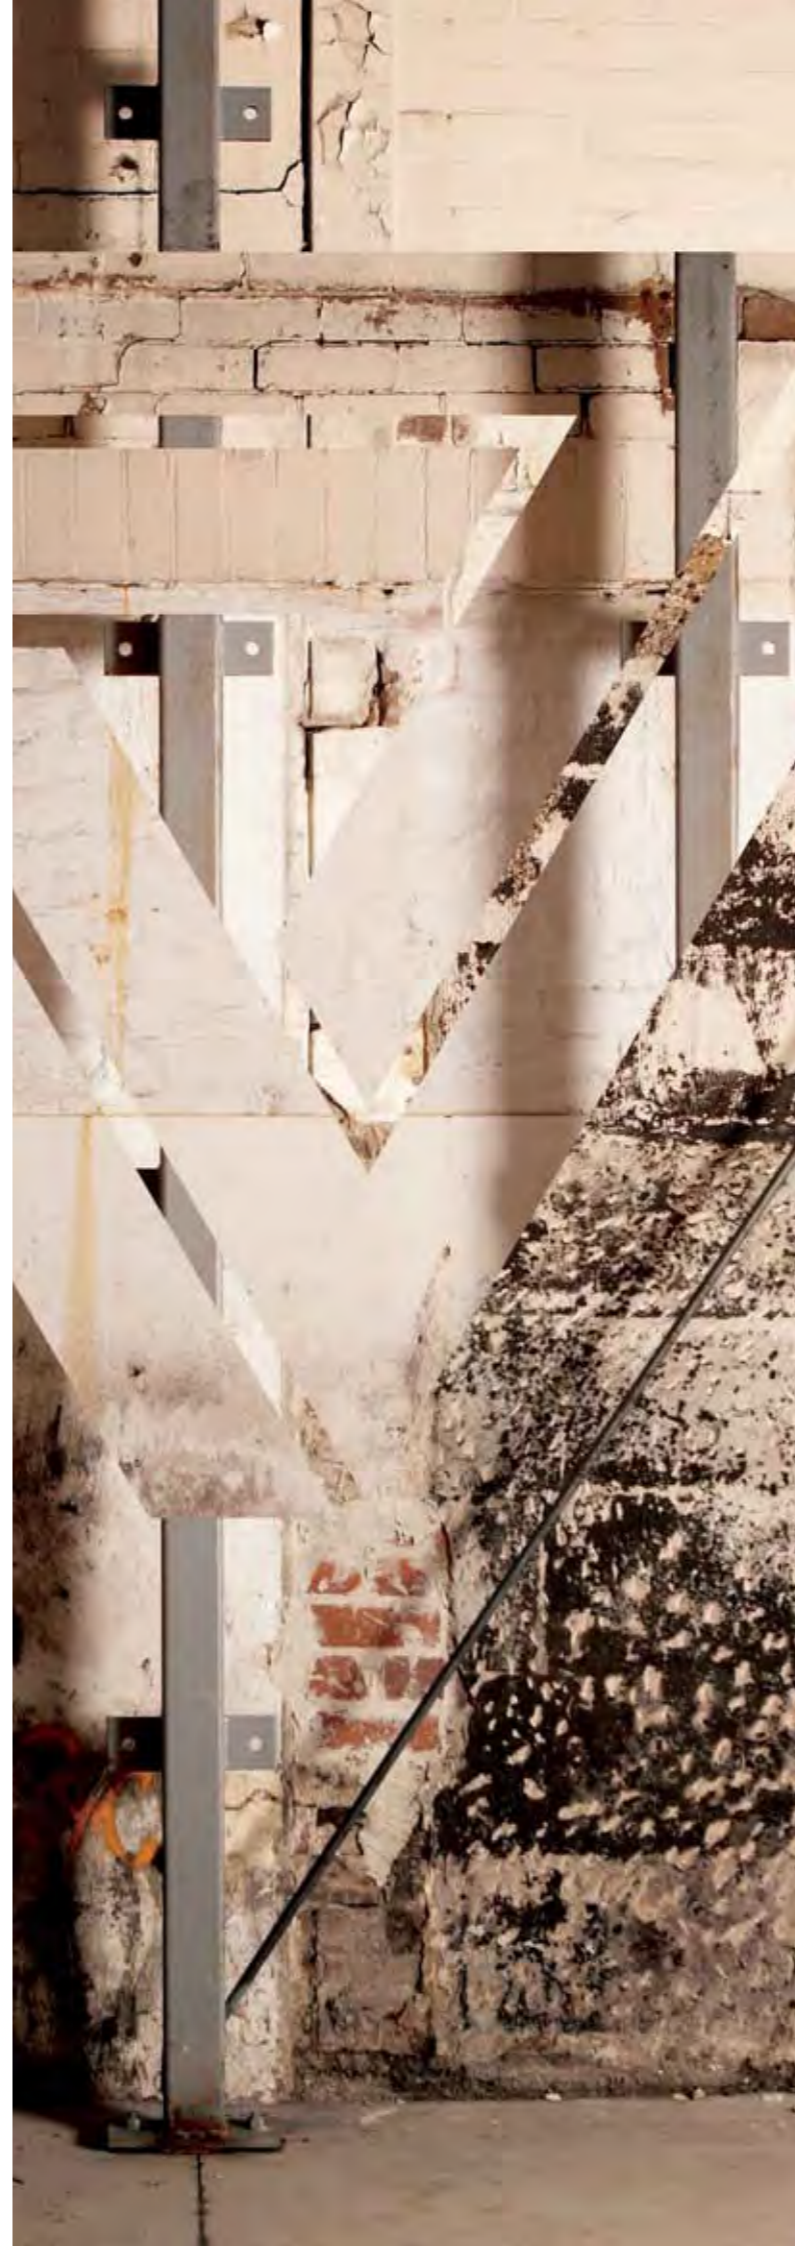

BUST: Measure around the body with the measuring tape on top of the fullest part of the bust. Keeping the tape measure level and straight, put 1 finger under the tape measure to give yourself a little extra room for comfort.

NATURAL WAIST: Measure around the smallest part of your waistline. Keeping the tape measure level and straight, put 1 finger under the tape measure to give yourself a little extra for comfort. Do not measure over the top of another pair of pants or jeans.

HIP: Measure around the widest part of your hips (sorry to do this) approximately 20 to 30cm below your natural waistline. This will be the widest part of your bottom, put 1 finger under the tape measure to give yourself a little extra for comfort. Do not measure over the top of another pair of pants or skirt.
